Advantages and Benefits

It is economical

Using this queuing management system allows you to do away with specialized equipment and use only off the shelf available hardware.

It systemizes workflow

Through this queuing system, your customer representatives are provided with a more systematic workflow which will enable them to focus more on the task at hand.

It is time efficient

The full automaton feature of the QueueRite system significantly cuts the time that customer representatives spend on serving customers for a single business transaction

It has customizable features

The QueueRite system can be configured according to the specific business requirements of customers. Complex queue management workflow can be configured. This is possible because our in-house programmers are able to configure the features of this program to suit various business needs.

Hardware Checklist

1. All PC or laptops to be used should be properly networked into a single LAN
2. All PC's to be used should have updated web browsers installed, preferably IE 8 or higher, Mozilla Firefox, and Google Chrome
3. The POS Printer software driver should be installed on the Queue server PC
4. If ticket printing is on a separate PC, the printer software driver should also be installed on this PC
5. The LCD/LED TV Monitor should be connected to an HDMI output from a laptop or an HDMI output from a desktop PC with a dual monitor video card
6. If there is no HDMI video output from the Queue server, then there will be a need for a separate set of PC speakers to deliver the system sounds
7. Our system requires all PC and laptops to have a fixed or static IP address since our system identifies the Queue Station based on the IP address.
8. The Queue Server PC should run Windows 7 or higher, preferably Intel Core i3 / equivalent or higher with 4.0 GB of RAM.
